"KID-1, a protein kinase induced by depolarization in brain.";

J. Biol. Chem. 273:16535-16543(1998).

C -!- CATALYTIC ACTIVITY: ATP + a protein = ADP + a phosphoprotein.

C -!- TISSUE SPECIFICITY: Present in a number of unstimulated tissues

C -!- INDUCTION: By membrane depolarization or forskolin.

C -!- PTM: Autophosphorylated.

C -!- SIMILARITY: Belongs to the Ser/Thr protein kinase family. PIM

n:hfamily.

MEDLINE=22682943; PubMed=12798037; DOI=10.1016/S1476-9271(02)00095-6; Chichester C., Nikitin F., Ravarini J.-C., Lisacek F.; Chichester C., Nikitin F., Ravarini protein forms."; "Consistency checks for characterizing protein forms."; Comput. Biol. Chem. 27:29-35(2003).

-i- CATALYTIC ACTIVITY: ATP + a protein = ADP + a phosphoprotein.
-i- SIMILARITY: Belongs to the Ser/Thr protein kinase family. PIM
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Eukaryota; Metazoa;

Patent No. US20020115120A1
GENERAL INFORMATION:
APPLICANT: Rosanna Kapeller-Libermann
APPLICANT: Rosanna Kapeller-Libermann
APPLICANT: Kyle MacBetth
TITLE OF INVENTION: NOVEL MOLECULES OF THE HKID-1-RELATED PROTEIN FAMILY AND USES
FILE REFERENCE: 35800/238856
CURRENT APPLICATION NUMBER: US/09/971,791
CURRENT FILING DATE: 2001-10-04
PRIOR APPLICATION NUMBER: 09/644,450
PRIOR APPLICATION NUMBER: 09/644,450
PRIOR FILING DATE: 2000-08-23
PRIOR FILING DATE: 1999-01-26
NUMBER OF SEQ ID NOS: 11
SOFTWARE: FastSEQ for Windows Version 4.0
SEQ ID NO 7
